

Reece Bonilla

“As a Nursing Student Ambassador, I’ve had the privilege of being a part of a community that fostered my growth as a student nurse and as a person. I was proud to be an official student representative responsible for leading tours of our high-fidelity simulation center, volunteering for school events and fundraisers, and overall being a positive role model for my classmates. This program provided me with ample networking opportunities and helped me create meaningful connections with professional nurses. This program gently nudged me out of my comfort zone, and I am grateful to be the professional nurse that it has molded me into.” – *Reece Bonilla, Undergraduate Nursing, Class of 2019*
